

PRACHPRO

Product Requirements Document

Real Estate Collaboration & Transaction Ecosystem

Document Type	Product Requirements Document (PRD)
Product	Prachpro v2.0
Version	2.0 — Updated
Status	For Review

1. Product Overview

Product Name	Prachpro
Product Type	Multi-sided PropTech Marketplace + Agent CRM + Transaction Management Platform
Target Market	Nigeria & broader Africa
Version	2.0 — Revised & Enhanced

Product Vision

To become the leading African real estate operating system that enables agents, developers, homeowners, renters, buyers, and shortlet operators to discover properties, collaborate, manage clients, complete secure transactions, and grow their businesses within one unified ecosystem.

2. Problem Statement

The African real estate ecosystem suffers from systemic inefficiencies that erode trust, slow transactions, and prevent market growth. Prachpro addresses these directly:

Problem	Impact
Fragmented property discovery	Buyers waste time across unconnected platforms
Poor trust between buyers and agents	Low deal closure and high abandonment
Unstructured agent collaboration	Missed referrals and commission disputes
Manual inspection workflows	Scheduling conflicts and poor follow-through
No transaction transparency	Fraud risk and buyer anxiety
Weak client management systems	Poor retention and lost leads
Unverified listings	Fraudulent properties damage platform trust
No audit trails	Disputes unresolvable, compliance gaps
Heavy WhatsApp dependency	No structured data capture or analytics

3. Product Goals

Business Goals

- Become the leading property collaboration platform in Nigeria and Africa
- Increase property transaction completion rates by 40% within 12 months
- Generate recurring subscription revenue across tiered plans
- Create network effects among agents, developers, and buyers
- Improve lead generation efficiency and reduce cost-per-acquisition
- Reduce fraud and transaction disputes through verification and audit trails

User Goals

Agents

- Find and share listings quickly
- Manage clients efficiently with full activity history

- Earn and track commissions transparently
- Track inspections and deal progress end-to-end

Developers / Homeowners

- Reach more qualified agents and buyers
- Track all interested clients and their journey
- Close deals faster with structured workflows

Clients / Buyers

- Discover verified, trusted properties
- Resume browsing with recently viewed and saved properties
- Track full transaction progress in real-time
- Verify documentation and complete payments securely

4. Product Scope & Phasing

Phase	Name	Scope
Phase 1	Marketplace MVP	Core listing, discovery, recently viewed, save for later, wishlist
Phase 2	Agent CRM & Collaboration	Client management, networking, referrals, inspection scheduling, audit logs
Phase 3	Transaction Workflow	Payment evidence, approvals, due diligence, audit trail, e-signatures
Phase 4	Client Dashboard	Buyer portal, transaction lifecycle, document vault
Phase 5	Intelligence & Automation	Analytics engine, AI assistant, smart recommendations, predictive insights

5. User Types

User Type	Description	Primary Actions
Guest User	Browses properties without account	Search, view, view recently seen listings
Agent	Core transacting professional	List, manage clients, schedule inspections, earn commissions
Developer	Uploads and manages project portfolios	List projects, track interest, manage agent relationships
Homeowner	Lists personal properties	Upload, manage enquiries, close deals

Buyer / Client	Searches and purchases properties	Search, save, inspect, pay, rate
Shortlet Operator	Lists short-stay properties	Manage availability, bookings, payments
Admin	Platform management	Moderate, approve, verify, configure
Super Admin	Full operational control	All admin actions + financial controls + audit review

6. Core Product Modules

6.1 Marketplace Module

Features

- Property feed with personalised ranking
- Advanced search with location, type, price, bedrooms, category
- Recently Viewed — persisted per user/session (NEW)
- Save for Later — bookmarking with organised collections (NEW)
- Wishlist / Saved Interests
- Land listings, Rentals, Sales, Shortlets
- Direct briefs and property sharing
- Referral code sharing
- WhatsApp integration (external fallback)

NEW	Recently Viewed: tracks the last 20 properties a user viewed, persisted across sessions (logged-in) or stored in browser session (guest). Provides quick re-entry to property discovery journeys.
------------	---

NEW	Save for Later: users can bookmark any property into named collections (e.g. 'Shortlisted', 'Shared with spouse'). Distinct from Wishlist/Interest, no agent notification is triggered.
------------	---

Property Card — Required Fields

Field	Details
Images	Required display field
Price	Required display field
Title	Required display field
Location	Required display field
Commission %	Required display field

Property type	Required display field
Verification badge	Shows if listing is admin-verified
Chat button	Required display field
Share button	Required display field
Save button	Required display field
Add to collection button	Adds to Save for Later collections

6.2 User Authentication Module

- Email registration with OTP verification
- Phone verification
- Login, password reset, social authentication
- Referral onboarding
- JWT authentication with session management
- Device tracking

6.3 Agent CRM Module

Features

- Assigned clients with full profile view
- Client notes, interests, ratings, rejection tracking
- Inspection scheduling and follow-up reminders
- Activity tracking — full timeline per client
- Client Insights: link clicks, saved properties, inspections, closed deals

6.4 Audit Trail & Activity Log Module (NEW)

A platform-wide immutable event log capturing all significant actions. This addresses compliance requirements, enables dispute resolution, and builds trust between platform participants.

WHY	Without audit trails, disputes about payments, document submissions, or agent actions have no resolution mechanism. This is critical infrastructure for a financial transaction platform.
------------	---

Events Captured

- User account actions: registration, login, profile edits, password changes
- Listing actions: created, edited, verified, suspended, deleted
- Client actions: assigned, notes added, rated, rejected

- Inspection actions: scheduled, rescheduled, completed, cancelled
- Transaction actions: each status change with timestamp and actor
- Payment evidence: uploaded, approved, rejected — with who and when
- Document actions: uploaded, viewed, downloaded
- Admin actions: all moderation, approval, and suspension events

Audit Log Requirements

Requirement	Detail
Immutability	Logs cannot be edited or deleted by any user, including Super Admin
Retention	Minimum 7 years for transaction-related events
Access control	Users see their own log; Admins see all; Super Admin can export
Data captured	Actor, action, timestamp (UTC), IP address, device, entity affected
Export	CSV/PDF export for compliance and dispute submission

6.5 Transaction Management Module

Workflows

Property Purchase

1. Inspection completed
2. Documents received and uploaded
3. Due diligence checklist completed
4. Availability confirmed
5. Contract received and e-signed
6. Payment account revealed to buyer
7. Payment evidence uploaded by buyer
8. Admin reviews and approves
9. Transaction completed — audit event fired

Rental Workflow

10. Inspection completed
11. Availability confirmed
12. Payment submitted
13. Tenancy agreement uploaded and e-signed
14. Admin approval

Shortlet Workflow

15. Virtual or physical inspection
16. Availability confirmed
17. Payment submitted
18. Booking approved — confirmation sent

NEW

E-signature support on contracts and tenancy agreements. Signed documents are hashed and stored in the audit trail with signer identity and timestamp.

6.6 Communication Module

- Agent-Client and Developer-Agent in-app chat
- Media and document sharing in chat
- Property-anchored conversations (context preserved)
- Push notifications, read receipts

NEW

Suggested: Add a 'Request Info' quick action on property cards that pre-fills a structured message to the agent — reduces friction and captures intent as structured data.

6.7 Client Dashboard Module

- Wishlist / Saved Interests
- Save for Later collections (NEW)
- Recently Viewed (last 20 properties) (NEW)
- Transaction portfolio with real-time status
- Installment tracking
- Inspection history
- Document vault — all uploaded documents in one place (NEW)
- Notifications and activity feed
- Assigned agent contact
- Payment history

6.8 Analytics & Insights Module

- Link reach and click analytics
- Property performance dashboard
- Agent performance scoring
- Recently viewed funnel — from view to save to enquiry (NEW)
- Save-to-enquiry conversion rate (NEW)
- Transaction insights and deal closure rate

KPIs

KPI	Target
Conversion rate (view → enquiry)	>8%
Listing views	Track weekly growth
Deal closure rate	5k/month target
Inspection-to-sale ratio	>30%
Agent response time	<10 mins
Save-for-Later to enquiry rate (NEW)	>15%
Audit events per transaction (NEW)	>8 events (quality signal)

6.9 Subscription & Monetization Module

Plan	Features	Target User
Herald	Property sharing, basic listings	New agents
Pro	Productivity tools, CRM, audit access	Active agents
SuperPro	Lead generation, analytics, priority support	Top performers
Firm	Enterprise tools, team management, full audit exports	Agencies & developers

Revenue Streams

- Subscription fees (recurring)
- Featured listings
- Lead assignment fees
- Ads and banner placement
- Transaction processing charges
- Compliance report exports (Firm/SuperPro)

6.10 Admin Management Module

- User management and verification
- Property moderation and listing approval
- Transaction approvals with audit review
- Full audit trail access and export
- Notification centre and push campaigns
- Banner and ad management

- Analytics dashboard

6.11 Blog & Content Module

- Dynamic blog with SEO support
- Categories, tags, related posts
- Share functionality

6.12 AI & Automation Module (Future — Phase 5)

- AI chatbot for buyer guidance
- Auto follow-up sequences for agents
- Property recommendations based on recently viewed and saved
- Smart notifications based on price drops or new matches
- AI response suggestions in chat

7. Customer Journeys

Agent Journey

19. Register and verify account
20. Complete profile (bio, ID, area of operation)
21. Upload and manage property listings
22. Share listings via referral codes and WhatsApp
23. Receive and manage leads
24. Schedule and track inspections
25. Close deals — all steps logged in audit trail
26. Earn and track commissions transparently

Buyer Journey

27. Visit marketplace (guest or logged-in)
28. Search and filter properties
29. View properties — recently viewed automatically tracked
30. Save properties to collections (Save for Later)
31. Express interest / wishlist (agent notified)
32. Connect with assigned agent
33. Schedule and complete inspection
34. Complete due diligence and transaction workflow
35. Upload payment evidence

- 36. Receive admin approval and keys
- 37. Rate experience

8. Notification System

Channels

- Push notifications (in-app and mobile)
- Email
- SMS
- WhatsApp (transactional fallback)

Trigger Events

Event	Recipients
Registration / Verification	User
Wishlist / Interest added	Agent + Developer
Property saved to collection (NEW)	User (confirmation only, no agent alert)
Inspection scheduled	Agent + Client + Developer
Payment evidence uploaded	Admin + Agent
Transaction status change	All involved parties
Transaction approved	Client + Agent
Property price drop (NEW)	Users who saved or recently viewed
New listing matches preferences (NEW)	Users with matching saved searches

9. Non-Functional Requirements

Performance

- App load time < 3 seconds on 4G
- 99.9% uptime SLA
- Scalable, cloud-native architecture
- CDN delivery for all images and media

Security

- All transactions encrypted end-to-end

- Secure file uploads with virus scanning
- Role-based access control (RBAC)
- Immutable audit logs — tamper-evident storage
- PII data minimisation and NDPR compliance (Nigeria Data Protection Regulation)

Scalability

- Multi-region support for pan-African expansion
- Modular microservices architecture
- Database sharding strategy for listings and audit logs

10. Success Metrics

Metric	Target	Notes
Monthly Active Users	100k+	12-month goal
Listings Uploaded	50k+	Cumulative
Deal Closures	5k/month	Phase 3+
Avg Agent Response Time	<10 mins	In-app chat
User Retention (30-day)	60%	—
Subscription Conversion	15%	Registered agents
Save-to-enquiry conversion (NEW)	>15%	Phase 1+
Audit coverage per transaction (NEW)	>8 events	Phase 3+

11. Risks & Mitigations

Risk	Likelihood	Mitigation
Feature overload slowing delivery	Medium	Strict phase rollout with acceptance criteria
Fraudulent listings	High	Verification system + admin moderation + audit trail
Poor agent adoption	Medium	Referral incentives + free Herald tier
Audit log storage cost	Low	Tiered storage: hot/warm/cold archival strategy
Data privacy compliance	Medium	NDPR compliance built into

		architecture from Phase 1
Scalability bottlenecks	Low	Modular microservices with independent scaling

12. MVP Recommendation

MUST HAVE — Phase 1

- Authentication (email + phone OTP)
- Property listings and search / filter
- Recently Viewed (last 20, session + logged-in) (NEW)
- Save for Later collections (NEW)
- Wishlist / Interest (agent notified)
- WhatsApp contact integration
- Sharing and referral codes
- Client dashboard (basic)
- Transaction evidence upload
- Admin approval flow
- Basic audit logging (registration, listings, transactions)

SHOULD HAVE — Phase 2

- In-app messaging
- Inspection scheduling
- Activity points and gamification
- Push notifications
- Price drop alerts for saved / recently viewed properties (NEW)
- Full CRM with client notes and activity timeline

LATER — Phase 3+

- AI chatbot and smart recommendations
- Full analytics engine
- E-signature integration
- Recommendation engine (based on recently viewed + saved behaviour)
- Advanced CRM automation
- Compliance audit export (PDF/CSV)

13. Improvements Summary (v1 → v2)

The following enhancements were introduced in this revision:

Area	Improvement	Phase
Discovery	Recently Viewed: session + account-level persistence	Phase 1
Discovery	Save for Later: named collections, distinct from interest/wishlist	Phase 1
Trust & Compliance	Audit Trail: immutable event log across all platform actions	Phase 2
Transactions	E-signature on contracts and tenancy agreements	Phase 3
Notifications	Price drop alerts triggered by saved/recently viewed behaviour	Phase 2
Notifications	New listing match alerts for saved searches	Phase 2
Client Dashboard	Document Vault: centralised view of all uploaded documents	Phase 4
Analytics	Save-to-enquiry and recently-viewed funnel reporting	Phase 5
Security	NDPR compliance requirement formalised	Phase 1
Communication	Request Info quick action on property cards	Phase 2

14. Final Product Positioning

Prachpro is:

"An all-in-one real estate operating system that helps African agents, developers, and buyers discover properties, collaborate, manage transactions, and close deals efficiently — with the trust and transparency that the market demands."
